DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a method of ablating or irradiating a tumor, classified in class 606, subclass 41.
- II. Claims 16-17, drawn to a method of sequential tumor treatment, classified in class 128, subclass 898.
- III. Claims 18-19, drawn to a method of differentiating between instruments used in surgery, classified in class 128, subclass 898.
- IV. Claim 20, drawn to a biopsy method, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as imaging techniques for treatments completely unrelated to tumors. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Groups I-IV is not required for Groups I-V, restriction for examination purposes as indicated is proper.

Art Unit: 3739

A telephone call was made to Leonard Holtz on 5-25-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter J. Vrettakos whose telephone number is 571-272-4775. The examiner can normally be reached on M-F 9-6.
